

Flight Risk Assessment Tool

Instructions and Troubleshooting
By NEXTGENsystems L.L.C

Signup and Login

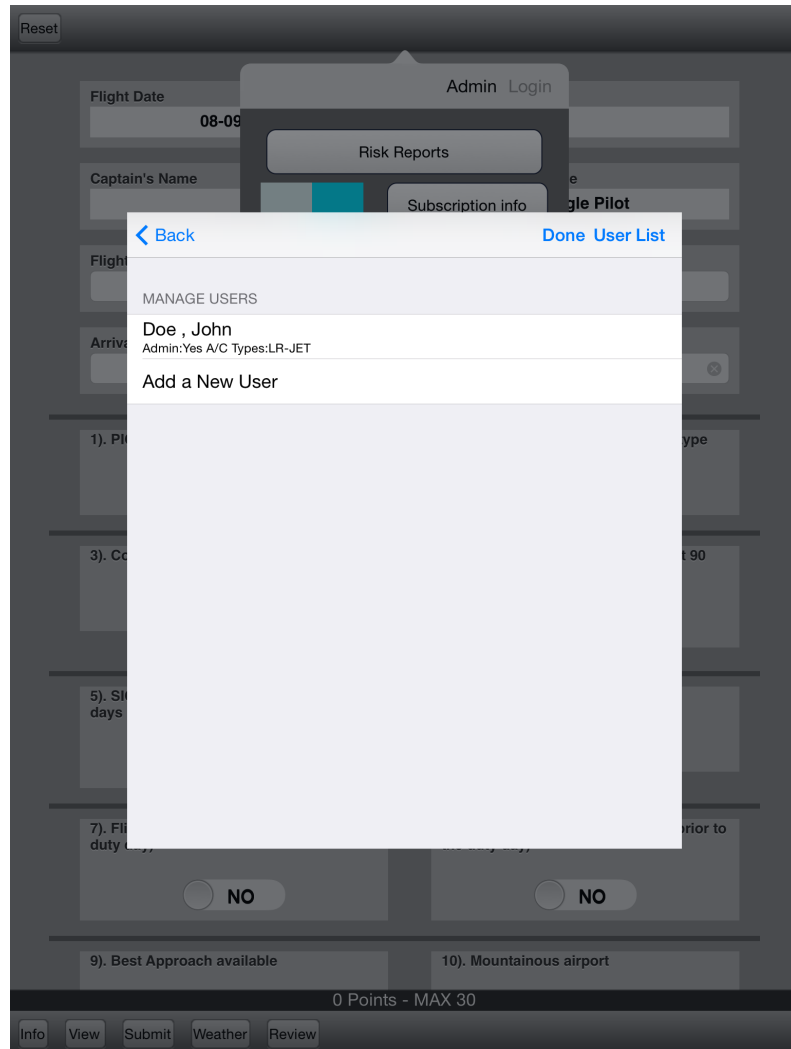

The app requires the user to login to get out of demo mode.

Email us at contact@nextgen-systems.com to get started.

Once we set up your companies account, the admins for that account will have access to add and remove users.

Get to this screen by pressing INFO / ADMIN / USERS

Below is a the screen where you add users and generate a PDF with all the users passwords, under “User List”

Push Notifications

The App utilizes push notifications to notify your pilots device that there is a update. It only uses the “Badge” type so no sound plays or message appears.

Many users decline to allow this service when installing the App. This requires the admin to contact the pilot and tell him to manually update.

To enable push notifications visit this site for a walk though.

<http://ipod.about.com/od/iphonewalkthroughs/ht/enable-push-notifications.htm>

Remember the app only needs the “Badge App Icon” enabled.
